Project Description:

The Remote Delivery Facility is a 250,000 square foot shipping and receiving facility adjoining the Pentagon. The Remote Delivery Facility significantly improved the physical security of the Pentagon by providing a secure consolidated location to receive and screen thousands of items shipped to the building each day.

Green Features:

A landscaped roof provides new green space with indigenous vegetation and water reuse in what was once an asphalt parking lot. The roof landscaping also reduces storm water volume on the site and heat loading of the facility. The Remote Delivery Facility is registered as a pilot project with the U.S. Green Building Council's Leadership in Energy and Environmental Design (LEED) program. The facility includes a building control system for energy efficiency and indoor air quality.
